TruFit PDU

50 – 300kVA

Designed to provide an unmatched combination of power density, safety, and sustainability, the TruFit PDU brings highly configurable power distribution to the consumer. Its compartmentalized system architecture requires only front access for complete system operation and maintenance, ensuring an easier fit into the white space. A holistic view of overall system health is supported by the PowerView™ advanced monitoring and integrated thermal monitoring package.

Features

Optimal fit

- Front access only design for better fit into your floor plan
- Installation, operation, and maintenance of any serviceable components from front
- Eliminates need for additional side or rear clearances

True and proven reliability

- Equipped with ABB's SACE Tmax XT breakers
- True reliability through extreme breaking capacity in compact frames
- Safe and reliable interruption of faults

Centralized health/fitness monitoring

- Combines the usual metering/monitoring with optional integrated thermal monitoring solution
- Eliminates need for expensive 3rd party metering solutions
- Simplified communications through centralized native PDU monitoring system

Prioritizing safety

- Compartmentalized design to minimize exposure to potential arc flash events
- Isolation of consumable/serviceable components from hazardous voltages

TruFit PDU

50 – 300kVA

Technical specifications

General data		
Standards	ETL listed to UL 891	
Access requirements	Front only for installation, operation, and maintenance	
Cable entry/exit	Top and/or bottom	
Mechanical characteristics		
	Dimensions	Weights
Main cabinet	42"W x 36"D x 78"H	</= 2650 lbs
24"W front facing sidecar(s)	24"W x 36"D x 78"H	</= 340 lbs
Electrical characteristics		
Transformer		
kVA rating	kVA	50, 75, 125, 150, 225, 300
Input/primary voltage		480 VAC, 3-phase, 3-wire + ground
Output/secondary voltage		208/120 VAC, 3-phase, 4-wire + ground
Winding material		Aluminum (std.), Copper (opt.)
Input/output frequency	Hz	60 +/- 5% (57–63Hz)
Efficiency		DOE 2016 compliant
Temperature rise	[°C]	150
Inrush		11x
K-rating		K4 (std.), K13 & K20 (opt.)
Compensation taps		(2) 5% full load compensation taps, (1) above & (1) below nominal
Output/distribution specifications		
Panelboard distribution		
Panelboard types/brand		GE by ABB 42-pole, ABB ProLine 42-pole
Panelboard amp rating	[A]	225A, 400A
Sub-feed circuit breakers		
Sub-feed types/brand		ABB XT3, ABB XT4, ABB XT5
Sub-feed amp rating	[A]	225A, 250A, 400A
PowerView metering and monitoring		
Basic metering and monitoring	PowerView Core	PowerView Pro
Primary & secondary of transformer (PSB)	Standard	Standard
Branch circuit management (BCM)	Optional	Optional
Sub-feed circuit management (SFCM)	Optional	Optional
Accuracy	+/-2%	+/- 1%
Harmonics measurements	Up to 9th order	Up to 35th order
Waveform capture	Not Available	Standard
Custom circuit naming/numbering	Not Available	Standard
Custom grouping of circuits	Not Available	Standard
Global time synch via NTP	Not Available	Standard
Breaker status monitoring Open, closed, tripped) via Discrete Input Board (DIB)	Not Available	Standard
Integrated thermal monitoring via Thermocouple Interface Board (TIB)	Not Available	Standard
Communication interfaces		
Modbus RTU (via RS485) & Modbus TCP (via Ethernet)	Standard	
Local EPO & remote EPO	Standard	
Optional – add ons		
40 kA primary Surge Protective Device (SPD)	Optional	
40 kA secondary Surge Protective Device (SPD)	Optional	
Isolated grounds for panelboards	Optional

Cyberex PDU

The Cyberex PDU offers almost unlimited configurations of panelboards and sub-feed breakers to meet every load requirement. Three cabinet designs support ratings up to 1.3MW.

Our advanced Cyberex PowerView circuit management solutions enable end users the ability to monitor and manage any combination of individual branch circuits or sub-feed circuits from a single hardware platform.

With several different standard sidecar options, the Cyberex PDU offers the benefit of flexibility to system designers, installers, and owners alike.

Features

- Multiple panelboard and breaker configurations offer the highest level of configurability
- Cyberex PowerView system monitoring provides ultimate flexibility for collecting and managing power data with revenue grade accuracy
- Advanced branch circuit and sub-feed circuit management (optional) provide enhanced power data collection for branch circuits and sub-feed circuits
- Remote monitoring interfaces to building management system using Modbus, and web server
- Industrial use, long life, 6.5" color touchscreen LCD with integrated unit status LED ring-light
- Efficient isolation, copper wound transformers increases performance and significant reduction of EMI and RFI noise
- Spacious cable management and landing area simplifies frequent wiring changes and ease of installation
- Easy maintenance access ensures safe and trouble-free repair in minimum time
- Compact footprint maximizes valuable floor space
- ETL listed to both UL 60950-1 and UL 891
- Suitable for installation inside or outside IT-designated spaces
- Optional seismic-rated floor stands available

2-door
350 – 800kVA

3-door
50 – 225kVA and most 300kVA

Static transfer switch (STS)

Cyberex SuperSwitch[®]4

The SuperSwitch[®]4 is available in select cabinet sizes that cater to your serviceability requirements. Its standard ultra-dense design maximizes physical floor space. Front access is required for operation and removal of serviceable components, while one side or rear access is required for installation and tightening of customer connections. A full front access cabinet design is also available for complete operation, maintenance, installation and IR scanning accessibility.

Fully rated hockey puck SCRs are employed to prevent system damage after load faults. The superior cooling design of the assembly enables higher current applications. Infrared scans are easily accomplished without removal of assembly. Connections and maintenance are made easier by staggered phase connections and ample gutter space. 100% of connections are torqued ensuring maximum reliability.

Features

- Expands SuperSwitch technology with enhanced platform and features
- 10.4" color TFT industrial use LED touchscreen GUI
- 25% faster transfer times
- 40% lower inrush limiting
- Enhanced power quality detection
- Field calibration support
- USB port for software upgrades; data and event downloads
- 16 user configurable alarm relays
- 10 user inputs for communications control
- Enhanced meters and trending
- 10 cycle waveshape captures of critical power events
- Improved circuit redundancy

¹ Contact factory for 600V SCCR's.

² If cable entry and exit are from opposite sides (e.g. Bottom Entry and Top Exit), please consult with factory.

SCR-based neutral switching

The Cyberex SuperSwitch®4 offering has expanded to include models for 4-pole applications requiring switching of the neutral. For installations with separately derived systems, the SuperSwitch®4 minimizes the potential for circulating neutral currents through the use of solid state switching technology.

4-pole offerings

Amp ratings	200A, 400A	600A, 800A

Components		Electrical characteristics
Power semiconductors	Hockey puck type, type II fuseless design	Amp ratings 200A, 400A, 600A, 800A
User interface	10.4" color TFT industrial use VGA LED touchscreen GUI	Voltage ratings 208V, 380V, 400V, 415V
Cooling	Redundant fans with hall effect failure sensing	SCCR ratings 65kAIC, 100kAIC
Power supplies	Redundant	Frequency 60Hz
Surge protection	SPD on each source	Overload capability 125% for 30 min, 150% for 1 min, 200% for 10 sec, 1000% for 3 cycles, 1500% for 1 cycle
Control logic	No single point of failure	Operational characteristics
Output load switches	Redundant	Full load efficiency Up to 99.4% (415V), 98.7% (208V)
Power wire and bus bar	Copper	Bypass System guided
Protection	UL 489 Molded Case Switches	Sense + transfer time (In phase) < 4ms patented A9 transfer method
Communications and software		Sense + transfer time (out of phase) < 15ms patented Real Time Flux Control method
Alarm relays	16 form "C" relays	Downstream transformer inrush ¹ < 1.2x nominal transformer rating
Building alarm inputs	10 dry contact inputs	Operating temperature 0 to 40°C
EPO	Local or remote	Storage temperature 0 to 80°C
Modbus	RTU over RS485, TCP over Ethernet	MTBDE 1.5 million hours
Service port	Accessible without opening doors or panels	Standards
Event alarm log	5000 events	Safety ETL listed to UL 1008S cETL listed to CAN/CSA-22.2 No. 178
Power quality and metering		EMC FCC compliant (part 15)
Loss of source detection	2ms, PLL detection per phase	Enclosure NEMA 1
Voltage	Each source and output. True RMS, up to 13th harmonic	
Current	Each source and output. True RMS, up to 13th harmonic	
Peak current detection	Each source, resettable	
Source reacquisition	3 cycles	

¹ Based on DIR transfer.

Static transfer switch (STS)

Cyberex SuperSwitch®4

4-pole technical specifications 200A – 800A

Standard cabinet (4-Pole)						Heat Output
